Summary

Frontend Engineer with **4+ years of experience** building scalable, user-focused web applications using **React**, **TypeScript**, and modern JavaScript. Proven track record of leading cross-functional teams, driving UI architecture decisions, and delivering products end-to-end, with working knowledge of backend APIs.

Professional Experience

HashedIn by Deloitte

September 2021 – Present

Employer Location: Bangalore, Karnataka, India

Software Engineer III

September 2021 – Present

- Promoted from **Software Engineer I** to **Software Engineer III**, progressing through increasing ownership across frontend architecture, product delivery, and team leadership.
- Led a cross-functional team of **10 engineers** to revamp an internal **Performance Management Tool** in **3 months**, improving user experience ratings by **25%**.
- Built and launched **LearnHub**, an 8-week onboarding platform with **4 learning tracks**, assessments, project work, and auto-provisioned **GitHub repositories**.
- Expanded **LearnHub** into an organization-wide self-directed learning platform, enabling admins to publish courses and **100+ employees** to track upskilling progress beyond onboarding.
- Owned end-to-end delivery of the **Upward Feedback** feature for an internal HR tool, driving a **30% improvement** in employee satisfaction scores.
- Developed and published **hds-ui**, an open-source **npm package** integrating Ant Design and **Chart.js**, standardizing UI development across **3+ products**.
- Designed reusable component architecture using **React** and **TypeScript**, improving development velocity and ensuring UI consistency across internal tools.
- Migrated a US-based employment listing platform from **Django** to **React**, delivering a **20% increase** in user engagement within **3 months**.
- Redesigned the employee skills feature into a modular two-layer structure, enabling data-driven project allocation and reducing retrieval time by **10%**.
- Collaborated with product and backend teams to define REST API contracts and support evolving frontend requirements.

VelascoSys, Inc.

March 2021 – April 2021

Employer Location: Mangalore, Karnataka, India

Frontend Developer Intern

March 2021 – April 2021

- Designed and developed the company's public-facing website using **Angular** and **Figma**, delivering UI from wireframe to production during a **2-month internship**.
- Built reusable UI components for an internal **Blockchain**-integrated project, translating complex data flows into clean user-facing interfaces.

Projects

Learning Management System Revamp

June 2024

- Revamped a client-facing LMS to support **MCQ and coding assessments**, scaling concurrent student capacity from **100 to 500+**.
- Delivered **performance dashboards**, student databases, question banks, and detailed test reports while resolving key UI performance bottlenecks.
- **Technologies:** React, Redux, Python, FastAPI, DigitalOcean

Skills

Programming Languages: JavaScript, TypeScript, Python

Frontend: React, Redux, Angular, HTML5, CSS
